

University Orthopedics, Inc.

Medical Device Test Technician

Full-time position in the Bioengineering Department. The successful candidate will perform mechanical and biomechanical tests of medical devices and sports equipment, as well as assist in test projects including preparation of quotations, test design, data acquisition, writing of reports, as well as other duties as assigned. BS in Mechanical, Biomedical, or Materials Engineering and one to three years experience in laboratory setting a must. Knowledge of LabView, MATLAB, mechanical testing equipment and human anatomy is a plus. Excellent benefits, including tuition reimbursement.

Interested candidates please send or fax resume to or email to smartins@universityorthopedics.com.
